## **COLLECTION LAW**

### **Medical Collections**

Our firm's representation of health care providers ties in strategically with our personal injury practice, focusing on the aggressive pursuit of the payment of medical bills from automobile insurance, health insurance, workers compensation, commercial insurers, and individual debtors and/or their spouse, parent or step-parent. We represent hospitals, medical clinics and numerous other facilities throughout the State of Missouri.

We aggressively pursue unpaid balances for services provided by identifying all available insurance coverages, filing liens and monitoring personal injury claims, workers compensation direct payment claims and, when necessary, filing lawsuits. Every week we appear in numerous courts throughout the state, as well as the Division of Workers' Compensation to obtain payments of our clients' balances. The firm regularly updates clients on developments in automobile insurance law, workers' compensation law and health law that will affect payment of their bills.

### **Commercial/Individual Collection Law**

Our firm represents commercial and private creditors on overdue accounts, promissory notes and other contracts. We utilize a powerful array of tools including wage garnishments, bank account attachments and real estate attachments to compel the payment due our clients.

Our efforts are especially effective if you know the location of any of your debtor's assets such as employment, real estate and/or bank account information. We also are able to employ less aggressive tactics in appropriate circumstances, particularly when the client hopes to maintain a future business relationship with the debtor.
